V86 Series Ball Valves VC86 Series CNG/NGV Valves

Pressure Rating up to 689 bar (10,000psig)

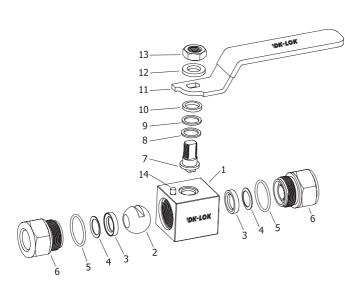

**VDK-LOK** 

Valves

# Features

- High pressure up to 10,000 psi (689 bar).
- Blowout proof design with internally loaded stem.
- Handle indicates the flow direction.
- Positive stop with a robust stop pin.
- High flow rate with maximum orifice.
- Various end ports including DK-Lok tube port.
- Various flow control with side and bottom inlet
- port on 3-way diverter valves.

# **CNC/NGV** Certifications

VC86 Series with PEEK seat and HNBR O-rings are available with CNG/NGV certifications.

The sealing material of seat and O-rings are selected for compatible with CNG.

VC86 Series with the live loaded compensation disc spring reacts on ball movement in both low and high pressure systems in CNG and NGV applications.

#### Operation

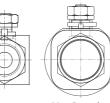

- 2-way positive shut off and 3-way directional control of fluids in process, power and instrument application.
- Valves are designed to control fluids in full open or full closed position.

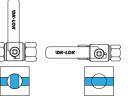

## **Factory Test**

Every valve is tested with nitrogen gas @1,000 psig (68 bar) for leakage at the seat to a maximum allowable leak rate of 0.1 SCCM. The stem packing is tested with nitrogen gas @1,000 psig for no detectable leakage.
